- **REQUEST 1**

- **\$1-out (60 months) \$910.61**
- **FMV (60 months) \$843.30**

- **REQUEST 2 (Appraisal District)**

- **\$1-out (60 months) \$106.32**
- **FMV (60 months) \$98.38**

- B&W impressions, billed monthly at \$.0060 per impression
- COLOR impressions, billed monthly at \$.0540 per impression
- Rains County will only pay for what it prints monthly
- Monthly service invoice includes all toner, parts and labor
- Delivery, Installation & Training included
- Budget Business Systems pricing **INCLUDES** the cost to return the existing copiers
- Commissioner's Court, Sheriff COLOR and Courtroom will have copiers donated

Prices valid for 30 days from the date of this proposal for NEW copiers

BBS Bonus

Budget Business Systems would like to donate two (2) color copiers and one (1) B&W to Rains County, to assist in meeting its budgetary goals.

In our original proposal, we included three (3) donated copiers for:

- Commissioner's Office
- Courtroom B&W
- Sheriff's Office, outside booking

These copiers will be low-meter copiers, that meet or exceed the specifications outlined in the RFP.

By accepting these donated copiers, it will reduce Request 1's pricing to:

- **\$1-out (60 months) \$733.88**
- **FMV (60 months) \$679.63**

Prices valid for 30 days from the date of this proposal for NEW copiers

| Introduction

February 19, 2026

Dear Rains County Commissioners,

Thank you for the opportunity to evaluate your current business technology and recommend solutions for your unique requirements. As you assess our recommendation, we trust you will also evaluate our merit as your potential strategic partner. Prior to embarking on a technology initiative, we believe selecting the right partner is step one.

As a partner, we want to be a *Difference Maker*. Identifying and resolving technology pain is crucial — but Difference Makers deliver more than a "box." They reveal technology-driven solutions that bolster business productivity and ensure a solid return on technology investment. They listen well. They develop thoughtful, relevant solutions. They are accountable for results.

Again, we thank you for the opportunity to present and discuss the enclosed solution. We look forward to earning your trust as a technology partner and becoming a Difference Maker for you and your organization.

Sincerely,

Trey McFarlin

My Personal Bio...

I have been assisting clients improve their businesses by implementing new office technology and workflows through Datamax for over eight years. I am certified and specialize in every product line that Canon and Kyocera have to offer - from desktop scanners, printers, walk-up MFPs to the large production printers and wide format roll-to-roll and flatbed machines as well. I am both Fiery and Color G7 certified to assist in developing workflows for any color-specific applications that one may have. I have experience in multiple positions within our organization from Business Process Consultant - to Production Systems Specialist - to Area Sales Manager of our Sulphur Springs office. I am always seeking to better myself and those around me.

My Commitments to You...

My Commitments to You...

1. To help you uncover any, and all, hidden pain points that you may be currently experiencing
2. To provide you with the very best solution specifically catered to address those pain points
3. To ensure that all who need it are fully trained on this new solution
4. To respond in a timely manner to all phone calls, text messages or emails from your organization
5. To follow up with you on a quarterly basis to help ensure our 5 Year Total Satisfaction Guarantee

Summary of Benefits

Customer Objectives:

- ▶ Objective 1: Workflow Prioritization
 - Aim to reduce non-company related tasks to a minimum, and redirect workflows to more profit-driven actions.
- ▶ Objective 2: Reliability and Durability
 - Seeking a copier/printer that is known for its long-term reliability and durability, requiring minimal downtime for repairs.
- ▶ Objective 3: Ease of Use and User-Friendly Interface
 - Looking for a more intuitive user interface and easier navigation for users.
 - Streamlined maintenance and troubleshooting processes.

Current Challenges:

- ▶ Challenge 1: Lack of Comprehensive Support
 - Without ongoing support and guidance from experienced technicians, any issues that are not promptly addressed could lead to your operations coming to a halt. Such as, when toner isn't monitored or delivered in a timely manner.
- ▶ Challenge 2: Inefficient Workflow Processes
 - The current office administrative workflows may lack specific design of function, leading to inefficiencies and an inability to keep up with modern business requirements resulting in lower profitability per hour.
- ▶ Challenge 3: Outdated Technology
 - The current copier device may lack the latest technology advancements, leading to inefficiencies and an inability to keep up with modern business requirements.

Top Decision Criteria:

1. Decision 1: Budget and Value
 - i. Optimize expenses while maximizing copier performance and features.
2. Decision 2: Vendor Reputation and customer Feedback

3. Decision 3: Equipment Quality, Reliability, and Functionality
 - i. Printing speeds, resolution, scanning capabilities, paper handling, finishing options and compatibility with required software and systems.

Summary of Benefits

Summary:

- ▶ Summary Benefit 1: Cost-Efficiency and Value
 - Benefit from cost-effective leasing arrangements that ensure optimal value for investment in cutting-edge technology
- ▶ Summary Benefit 2: Exceptional Performance and Support
 - Lease a printer or copier through Datamax, Inc. for top-tier performance backed by dedicated service and technical support.
- ▶ Summary Benefit 3: Customized Leasing Solutions
 - Datamax, Inc. offers tailored lease options that match specific budgetary needs and organizational requirements.

Conclusion:

Datamax, Inc. has proudly served a diverse range of clients for over 60 years, providing unparalleled service, support, and market-leading products. State & Local Government

Datamax understands the challenges facing state & local governments today. Our technology portfolio addresses “do more with less” challenges by lowering costs, automating processes, and improving communication between staff, elected officials, and citizens. We provide the freedom to focus on delivering top quality public services—with smaller budgets and smaller staff counts. **Count on Datamax to maximize the technology that matters!**

Datamax can help you:

- enable citizens to gain online access to public records, agendas and minutes as well as improving internal distribution,
- automate government HR onboarding, simplify human capital management and securely manage personnel records,
- protect sensitive employee information (SSNs, HR Records, etc.) with a multi-layered, Managed IT Services engagement.
- implement electronic government forms and workflows to alleviate broken or manual paper processes and reduce expense, and
- exchange information with other government agencies and constituents, leveraging comprehensive of DoD 5015.2-Certified Records Management security capabilities to protect information from unauthorized access or release.

Through relevant technology advisory and total solution deployment, we help state and local governments “go vertical” by maximizing their business processes, communications, and budgets.

Advantages You'll Realize.

Workflow Management

Automate complex multi-department processes including: accounts payable processing, case management, contract management, procurement, permitting and human resource onboarding, and others.

Privacy and Security Management

Deploy privacy and security solutions and services developed specifically to comply with the many regulatory requirements established within the Federal Information Security Management Act (FISMA).

Electronic Document Management

Increase productivity by automatically converting scanned images to editable documents, in multiple file formats, directly from a MFP device.

Print On Demand

Brochures, building & planning permits, and public works documentation can be securely submitted to networked printers anywhere within your facilities, at any time.

Cost Reduction and Management

Eliminate expensive pre-printed government forms, minimize the need for multiple fax lines, and control print costs through enforceable print management policies.

Services We Offer.

Unified Communications as a Service (UCaaS)

Datamax's UCaaS unifies government-related channels for communicating and conducting business - phone system, team chat and messaging, video conferencing, file collaboration and more - under one manageable, reliable, and secure platform.

Network Management

Leverage comprehensive network services featuring **TechCare**® Managed IT Services, Cloud Services, Information Security Services, and **TechCare**® **University** User Training for IT specific initiatives—all supported by 24/7 **TechView**® remote help desk support.

Print Management

Optimize your print output through best-in-class print technology and the industry's most responsive approach to managed print services—**PrintCare**™. All supported 24/7 by **PrintView**™—remote access for printing and connectivity.

OMNIA[®]

PARTNERS

OMNIA Partners is the largest and most trusted cooperative purchasing organization for public sector procurement. We have brought together the nation’s two leading cooperative purchasing organizations – National IPA and U.S. Communities – under one roof to form OMNIA Partners, Public Sector. The collective buying power of these unified purchasing cooperatives delivers superior value and savings for public agencies nationwide.

OMNIA Partners, Public Sector is the most experienced cooperative purchasing organization for [state](#) and [local government](#), [K-12 education](#), [colleges](#) and [universities](#).

Use of [Cooperative Contracts](#) reduces the cost of goods and services by aggregating the purchasing power of public agencies nationwide. Our participants have access to the largest portfolio of competitively solicited and publicly-awarded contracts with best-in-class national suppliers.

All contracts are awarded by a government entity utilizing industry best practices, processes and procedures. We adhere to the highest standards of procurement so you can feel secure knowing that you are in full compliance with industry regulations.

Omnia’s team of certified public procurement professionals and cooperative purchasing experts is committed to bringing value to you and your government agency. We act as your advocates to leverage cooperative purchasing as a strategic part of your procurement strategy so you can drive efficiency, effectiveness and real savings within your agency or organization.

OMNIA Partners saves you time and money. Participating in the cooperative buying power of more than 234,000 entities helps you do more with less by reducing product and administrative costs. We are the largest and fastest-growing organization in public procurement, creating maximum purchasing power and resources for our participants.

OMNIA Partners, Public Sector participation has tripled over the past eight years. We continue to put the people, processes and solutions in place to support the needs of public agencies and educational institutions nationwide.

The Evolution of Printing Starts Here

Transform your workspace with quality you can rely on.

Kyocera Evolution Series

It's Time to Evolve

New challenges demand a fresh approach. You need the best tools to drive your business forward during challenging times.

Meet the Kyocera Evolution Series: **robust, versatile platforms that have been built to last**. Combining cutting-edge technology and Kyocera's expertise, this new user-friendly series is ready to drive your productivity to new levels.

Fewer pains. More gains.

Complex printer controls drain valuable time and can impact your overall productivity. With the new Kyocera Evolution Series, the user interface has been totally redesigned to minimize confusion and maximize your capabilities, so that you enjoy more time for you and your business.

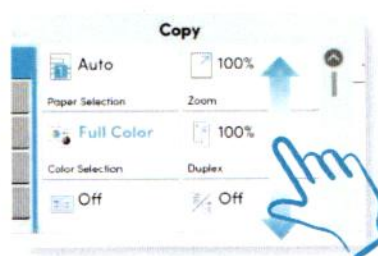

Meet the new user interface

With standard colors and easy to understand icons, carrying out tasks at the printer has never been easier.

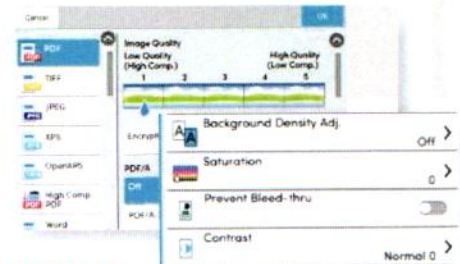

Simple

Standardized icons and graphics makes it easy to navigate the interface.

Intuitive

Emphasise important information and use gestures to select target items.

Efficient

Work quicker with less steps along with quick-switch settings.

Productivity You Can Rely On

You can't put a price on knowing your machine is always going to work. The Kyocera Evolution Series provides maximum performance.

Re-energize the way you work

High performance

Fast print and scan speeds for maximum efficiency.

Paper capacity

Less time filling paper trays means more time for quality work.

Digitization

Transform your workflows while pivoting to a paper-less workspace.

Durability

Long-lasting toners ensure professional quality that lasts.

Proven quality

Our devices have earned industry recognition for their reliability.

Optimal security

Enjoy some of the most advanced security technology on the market today.

Keypoint Intelligence – Buyers Lab (BLI) has judged a wide variety of Kyocera multi-functional printing devices to be “Reliable” and “Highly Recommended,” a globally-recognized seal of approval that demonstrates the quality of our devices.

Equip Your Business Against New Security Threats

With industry leading security protection, Kyocera's Evolution Series provide enhanced device and document security that address not only today's challenges, but the challenges of tomorrow as well. Security starts from the ground up and Kyocera ensures your data; your device and your network are always protected.

The Kyocera Evolution Series comes with a whole range of new security enhancements:

Secure/Multipurpose Internet Mail Extensions (S/MIME)

Improves the security of email encryption by providing security for authentication, message integrity, the use of digital signatures and privacy and data security.

Simple Certificate Enrollment Protocol (SCEP)

Automatically ensures that the device has the latest security certificates and makes the issuing of digital certificates as effortless as possible.

Online Certificate Status Protocol/Certificate Revocation (OCSP/CRL)

Provides settings that can verify the validity of the certificates used in encrypted communications.

Security Information and Event Management (SIEM)

Provides the ability to log security events that help monitor potential unauthorized operations like malware, intrusions and information leakage.

TLS version 1.3 support

A faster, safer and more secure method of cryptography that encrypts data by providing secure communication between web browsers and servers.

**Kyocera's ISO/IEC-
15408 Common Criteria
certification shows our
commitment to the highest
standards of information
security management.**

Artificial Intelligence

Artificial Intelligence (AI) is transforming the world around us. Its impact can be felt in many aspects of our daily lives.

The Kyocera Evolution Series has integrated new AI functions to improve performance while enabling new capabilities to be added throughout its lifecycle so that you enjoy the best possible MFP devices at all times.

Enhanced user experience and improved productivity

When scanning, you can now emphasize the handwritten part of the document without changing the format or image. This is a particularly useful function for proofreading documents, questionnaires, documents, drawings, etc. where thin lines and small characters are common. It's also possible to overwrite handwritten characters and lines on the document, using a white filler to make them invisible.

Superior image quality

With the new AI functionalities, improving low resolution images is quick and easy.

The KX printer driver supports the 'Super Resolution' function that compares images with information on the internet, identifying and converting low-resolution images to professional quality. Not only do you get fantastic quality, but you also spend less time making manual changes.

Be lean. Be green.

Work more efficiently while reducing your carbon footprint.

At Kyocera, we are committed to doing the right thing as a human being. By going that extra mile, we provide the solutions that help boost the way you work while reducing your carbon footprint.

Reduced
TEC

Reduced energy
consumption during
sleep mode

Increased
eco-credentials

Increased
productivity

The new Evolution Series brings to the table reduced Typical Electricity Consumption (TEC) values without compromising on print speed or productivity. Meanwhile, energy consumption during sleep mode has been significantly reduced from 0.7W to 0.5W for both devices.

**Being ISO 14001:2015 certified
shows we don't just talk about
acting sustainably.**

Your Pains. Our Solutions.

With the Kyocera Evolution Series you get:

User-friendly interface

Tablet-like functionality makes life easy. No more frustration at the printer!

Fast print and scan speeds

Get the documents you want when you need them and watch your productivity soar.

Smart and scalable solutions

Get your team working as one with solutions that help workflows run smoothly and efficiently.

Devices you can rely on

Kyocera devices are built to last the test of time. Get ready to say goodbye to costly downtime!

Optimal security

With in-depth security capabilities you can rest assured that your confidential data is safe with Kyocera.

So, what are you waiting for? Let's get to work!

Kyocera Document Solutions has championed innovative technology since 1934. We enable our customers to turn information into knowledge, excel at learning and surpass others. Your Challenges, Our Solutions

Cloud Ready for Complete Control

Through the Digital Cloud Platform, we address our customers' unique challenges with tailored solutions, so integration is easy.

Taking Productivity Further

Boost uptime and productivity with AI-enabled smart features, durable components and our dual-scan processor that holds up to 320 sheets.

Streamlined User Experience

With an intuitive UI via KX driver and built-in support for Microsoft Modern Authentication and other cloud services, these devices are adaptable across platforms.

Print in Flying Colors

With 1200x1200 dpi color printing on various media, our Tiered Color System cuts costs on standard 12"x18" paper sizes and banner sizes up to 12"x48".

Evolving for the Future

Maximize sustainability and minimize costs across the board with our environmentally-conscious design and long-life components.

Security by Design

Meet stringent requirements including the highest level of government certification with FIPS 140-3 to keep your information safe and secure.

Finish Projects In-house

From Z-folding to booklet making, the wide range of finishing options mean that you can bring finishing in-house.

Kyocera EvolutionNext Series

Cloud Ready for Complete Control

Devices come with pre-installed cloud based software solutions that are easily accessible through the digital cloud platform on the panel. These solutions enable you to simplify your digital transformation journey through data capture, sorting of data, and print management of your devices without high costs or complexity.

Print Control

Save money and resources with Kyocera Cloud Print and Scan (KCPS) by eliminating on-premise servers while ensuring optimal security at all times.

Capture

Shift to a smarter workplace by digitizing, labeling and indexing documents at your device with Kyocera Cloud Capture (KCC) to streamline workflows.

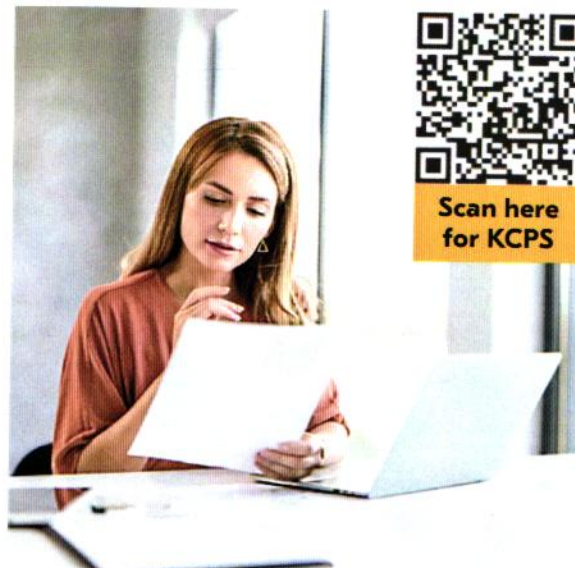

Management

Securely access and control documents for maximum efficiency in hybrid work environments with Kyocera Cloud Information Manager (KCIM).

Remotely Handle Print and Scan

When it comes to output, it's important to ensure secure and cost-efficient management of print and scan to be able to handle these processes remotely. Mobile print and scan allows you to reduce costs by optimizing print usage and avoiding waste through a tool like Kyocera Cloud Print and Scan (KCPS).

- + Add print quotas in sectors such as education to ensure that administrators can optimize print usage and reduce waste.
- + Facilitate hybrid work or work across numerous locations, such as in construction or retail, where printing is needed on the go.
- + Access documents off-site and facilitate mobile access to data wherever you might be.

for KCC

Capture to the Cloud

A cloud document management solution, Kyocera Cloud Capture (KCC) is a scalable, secure storage and organization tool for all hard copy and electronic files in a single location with daily backup. Available with a free 1-year trial, you can index documents with metadata assigned to each file to allow for easier searching and eSignature tools.

- + Finance teams can manage invoices efficiently with search and eSignature to ensure on-time payments and to meet audit requirements without hassle.
- + Digitize paper-based employee records for HR teams to support the talent lifecycle management.
- + Handle a vast number of critical documents and facilitate the easy tracking of files.

Process Data Efficiently

Manage documentation and data to facilitate the search and recovery system through a keyword search functionality, saving time in locating data and documents, while applying strict access permissions and automated workflows. Kyocera Cloud Information Manager (KCIM) is factory-installed and available at a low initial cost with no server requirements.

- + Automate the lifecycle of contracts and invoices by limiting user access and assigning ownership directly to owners to ensure a fluid process.
- + Collaborate across work locations, whether remote, in-person or hybrid, by sharing documents and data.
- + Store customer records securely and share data when required with other members of relevant teams.

Taking Productivity Further

The Kyocera EvolutionNext Series drives efficiency further by ensuring that documents can be scanned and processed into the cloud with accuracy.

Image Defect Prevention
Automatically detects and corrects issues like smudges, streaks, or distortions in scanned or printed images, ensuring high-quality output.

Paper Breakage **Sticky Note**

ID Card Scan/Copy
Captures both sides of an ID card in a single scan and arranges them on one page for easy printing or digital storage.

Front Scan **Back Scan**

Handwriting Enhancement
Improves the clarity and legibility of handwritten text in scanned documents, making notes, forms, and signatures more readable.

Original **Emphasis**

Tilted Document Correction
Automatically straightens scanned documents that were captured at an angle, improving readability and presentation.

Scanning **Tilt Correction**

Super Resolution
Enhances low-resolution images or scanned documents using AI-powered upscaling to improve sharpness and detail.

Sample **Convert**

Multiple Cropping
Detects and extracts multiple sections from a single scanned page, saving them as separate files for convenience.

Scan up to 16 sheets at once **Save by page/file**

Streamlined User Experience

In addition to pre-installed cloud solutions and a modern user interface, the EvolutionNext Series incorporates seamless integration with OAuth 2.0, enabling secure authentication for cloud-based printing and scanning workflows. With support for Microsoft Modern Authentication for Exchange 365, it ensures a modern and secure printing experience across environments.

Print in Flying Colors

Our award-winning A3 lineup has been recognized by BLI as the **Most Color Consistent A3 Brand Award** with good reason, as our products produce high-quality and low-cost color printing.

Using five years of results from testing devices across the industry, our devices were chosen as the most color consistent from hundreds of thousands of prints.

Tiered Color System

Kyocera's Tiered Color System uses firmware within our devices to measure usage levels for each document you print, so that you only pay for the color you use.

Color Optimizer

Select your desired color match from our color matrix, and our KX driver will use those RGB values to maximize color output to the preferred hue and lightness.

Fiery Print Software

Using industry-standard color profiles, Fiery ensures that there's an optimized color match to meet your expectations from the screen to the printed document.

With flexibility to match your needs

Print across media types

The Kyocera EvolutionNext Series can print across cardstock, coated, envelope, index tab dividers, labels, letterhead, plain, and recycled media.

And across sizes

Whatever the size you need, we've got it covered. From traditional sizes up to 12"x18" right through to banner sizes up to 12"x48", it's covered.

Evolving for the Future

At Kyocera, we firmly believe in doing the right thing as a human being for the world around us. Building upon these foundations, we seek to keep costs low and keep sustainability levels high across the board, through four main approaches:

Long-Lasting Drum

A Kyocera device has a drum life of up to 600,000 images, which is up to three times more than other manufacturers. Rather than needing to replace a solution's drum between one and **three times** through its lifecycle, you can reduce downtime and waste by counting on Kyocera technology.

Toner Recycling

In addition to our ECO footPRINT™ Toner Recycling Program, black toner cartridges can be reused as waste toner collection units, recycling and ensuring that your device creates as little waste as possible.

Toner Lock Technology

Research shows that up to 10-15% of toner is wasted by being thrown away too early. Toner lock technology minimizes waste as toner automatically opens to make the toner replacement process easy and straightforward.

Made from Recycled Materials

30% of plastics used in Kyocera products are recycled, and more than 99% of the total plastic can be recycled, ensuring that your footprint is kept to a minimum and environmental impact is limited.

Security by Design

Our security processes are drawn up to safeguard your data from start to finish on its journey through your workflows. With ISO Certifications for our design and manufacturing processes, your devices come secure from the very moment of conception right through to end-of-life care.

Guarded Access

Limit access to information only to those who need it, with tools like OAuth 2.0, IP filtering, secure print release, Wi-Fi Direct, LDAP, SMTP Authentication and encrypted PDF creation.

Secure Communication

Using HTTPS, TLS 1.3 and SMB 3.1.1 among others, we keep IPPS printing over TLS with SCEP certificate enrollment so that every step of the way is secure.

Protected Data Storage

Keep data under lock and key with AES 256 data encryption, certified by FIPS 140-3, IEEE 2600, HCD-PP and IEC-15408 as well as Common Criteria (validation pending) with HDD overwrite and trusted platform module.

Advanced Management

Three preset security level configurations ensure secure remote fleet management, with SNMP v3 and SIEM/Syslog monitoring, alongside secure boot and run time integrity checks.

Finish Projects In-House

A wide range of finishing options keeps your print jobs handled in-house.

Booklets

With the BF-9100 you'll have your new best friend when it comes to printing booklets, for uses which could include:

- + Product catalogs or brochures can be presented professionally
- + Event programs for open houses, productions or conferences can include all of the key details.

Z-fold

Take your 11" x 17" documents and fold them into 8.5" x 11" to have an opportunity to combine graphics and text.

- + Z-folds are a great way to present engineering schematics.
- + Multiple panels of a z-fold brochure provide ample space for images, graphics, and text, allowing for creative and engaging designs.

Inserter

This presence of two trays enables users to feed pre-printed pages as potential front or back covers or sheet inserts.

- + Avoids the need for pre-printed sheets to go through the high-temperature fusing process at the MFP.
- + Your pre-printed sheets won't get destroyed or melted.

Hole punch

Using the PH-7A or PH-7100, you can punch two or three holes and ensure ease of use of your document, including:

- + Reports, particularly on financial performance, which are going into a full binder for record keeping.
- + Training manuals and procedure guides which are stored and regularly updated.

Stapler

Ideal for your documents, staplers varied between 50 and 100 sheets give you the option for items like:

- + Medical packs including prescriptions, patient documents and other confidential documentation.
- + Combining multiple invoices or receipts for repeat customers or large events with multiple invoices.

MAXimize your MFP Security.

Today's organizations have built a strong perimeter of firewalls, intrusion prevention systems, and anti-virus software to protect their digital assets and information. Great attention is given to local network servers, user workstations, and cloud-hosted systems. However, endpoint network printers, mobile-ready printers, and multifunctional copier devices have been largely overlooked when it comes to data security.

Leveraging built-in and frequently-updated security features, **Datamax MFP Security + Canon** can help you gain high levels of control over these devices, your network communications, and your documents. *Here are five (5) security topics to consider.*

Controlling Access to MFPs.

MFPs are typically shared among employees within a department and often across departments. They may also be subject to use by authorized guests and even unwanted users.

Establishing measures to authenticate and control access and usage of the device itself, restrict specific functions of the device, and limit the destinations to which information can be transmitted is crucial.

Key Canon features to MAXimize controlled access:

- uniFLOW Authentication
- Access Management System (AMS)
- uniFLOW Secure Print
- Device-native Forced Hold

Transmitted or Stored Information on MFPs.

MFPs today are sophisticated, connected devices that can transmit and receive information over a network, store information, and connect to cloud services.

Such data in motion (or at rest) may include sensitive business information, important client data, or confidential employee details that must be protected.

Key Canon features to MAXimize protection of transmitted or stored info:

- HDD Security Features (Erase, Encrypt, Initialize at end of life)
- Port Control
- Protocol Version Selection
- Encrypted Secure Print/uniFLOW Secure Print
- imageWARE Secure Audit Manager Express
- Unified Firmware Platform

Cyber Threats to MFPs.

MFPs connected to corporate networks can become a target for hackers attempting to gain access to the device or to corporate data. It's important to implement security measures that allow only known, approved firmware and applications to run on the device, as well as prohibit tampering with firmware and applications.

IT management should also have the ability to monitor activity so that they can quickly identify and recover from potential threats.

Key Canon features to MAXimize protection from cyber threats:

- Verify System at Start-up
- McAfee[®] Embedded Control

MFP Security

Security Settings and Device Activity on MFPs.

IT support teams are typically responsible for managing a fleet of MFP devices. This becomes a burden if there aren't proper tools available to ensure that security settings are easily established and deployed universally across the fleet.

Requirements for passwords, such as expiration period, lockout time, and complexity should also be put in place.

Key Canon features to MAXimize protection the management of device security settings & activity:

- uniFLOW Security Policy Settings (with dedicated password)
- imageWARE Enterprise Management Console (EMC) with DCM Plug-in
- SIEM (Security Information Event Management) Integration

Regulation, Compliance on MFPs.

In today's digital, cyber threat-ridden world, government regulations compel businesses to satisfy compliance or risk facing penalties. The MFP, where sensitive data exists, should be part of your compliance strategy.

Responding to regulatory compliance requirements can be complex. And since an organization's sensitive information is interacting with MFPs, they become a necessary component of compliance initiatives.

Key Canon considerations for MAXimizing regulatory compliance:

- Align with a partner who has the knowledge of relevant compliance regulations and standards.
- Consider industry and government-mandated regulations (such as GDPR, CCPA, HIPAA, Sarbanes-Oxley, PCI, etc.) and their impact on how your organization handles information.
- Leverage a dedicated security leader like McAfee and feel more confident that your MFPs are protected from malicious threats and in alignment with information governance.

² Warm-up time may vary depending on the operating environment and usage.

- All specifications refer to letter-size paper of 80 gsm weight.
- The support and availability of the listed specifications and functionalities varies depending on operating systems, applications and network protocols as well as network and system configurations.
- The stated life expectancy of each consumable is based on specific operating conditions such as page coverage for a particular page size (6% coverage of letter). The actual life of each consumable will vary depending on use and other printing variables including page coverage, page size, media type, continuous or intermittent printing, ambient temperature and humidity.
- Some of the product illustrations contain optional accessories.
- Specifications and accessories are based on the information available at the time of printing and are subject to change without notice.
- Konica Minolta does not warrant that any specifications mentioned will be error-free.

Giving Shape to Ideas

PROTECTING YOUR DATA, EMPOWERING YOUR MISSION.

We understand the critical importance of security and compliance in your operations. Our Konica Minolta MFPs are designed to meet the stringent security requirements of state and local government regulations. This includes adherence to government regulations on the state and local level. That's why Konica Minolta offers lock-down protection with bizhub SECURE Platinum for government; a set of enhanced password and data security measures to give your bizhub MFP an extra level of security. We offer enhanced safeguard services provided by your Konica Minolta field engineer. Ensure that your constituents data is more than just secure - it's bizhub SECURE.

ENHANCE YOUR AGENCY'S DATA PROTECTION WITH bizhub PLATINUM SECURE FOR GOVERNMENT

Konica Minolta's bizhub SECURE Platinum service offers state and local government agencies robust data protection through advanced security measures. This service includes encryption of sensitive information, secure data overwriting and access control to prevent unauthorized users and ensures compliance with regulatory requirements.

Advanced Solutions

At Konica Minolta, we understand that your agency may not have the bandwidth or infrastructure to enable, configure and track the security functions that are required for compliance of internal mandates.

That is why we developed the bizhub SECURE Platinum for Government Service – to provide you with the resource you need to lockdown and protect any document data that might reside on the bizhub's internal storage media.

To secure and protect any document image data that might be present on the storage media, the following security functions can be enabled:

- Storage Media Encryption
- Storage Media Lock Password
- Automatic Deletion of temporary image data (applies to engines with HDD)
- Data overwrite of electronic documents on a timed basis

Ultimately, protecting constituent information is everyone's responsibility. Konica Minolta has led the industry in providing enhanced security features for the digital era – and with powerful bizhub SECURE Platinum for Government functions activated by your Konica Minolta Field Engineer, you'll have an additional line of defense against data theft and unauthorized access to personal identifying information, confidential documents, or devices.

To order the bizhub SECURE Platinum for Government Service, just contact your bizhub representative, and count on Konica Minolta to provide the MFP security services that your state and local agencies demand.

Konica Minolta's bizhub SECURE Platinum for Government provides the following set of features:

Advanced network and storage media security functionality to meet the needs of schools and universities. Bizhub SECURE Platinum for Government adds an enhanced layer of security to network ports and protocols - to further safeguard state and local agencies.

- Create a 20-digit secure alphanumeric password to lockdown your bizhub storage media
- Encrypt the entire contents of your bizhub SSD for remarkable data security
- Eliminate any trace of data even after it's been deleted with Temporary Data Overwrite (Temporary Data Overwrite conforms to DoD methods)
- Time your bizhub MFP to auto delete any material located in personal or public User Boxes, System User Boxes, Documents and Folders
- Disable Non-secured and unwanted Services, Protocols and Ports at the MFP
- Enable TLS v1.2* or v1.3 on the MFP (self-signed certificate)
- Enable Network User Authentication
- Enable MFP Audit Logs

KONICA MINOLTA

END-TO-END SECURITY ECOSYSTEM

Comprehensive Protection for Your
Devices, Data & Documents

Giving Shape to Ideas

WHY MULTIFUNCTION PRINTER (MFP) SECURITY MATTERS

Protecting business and customer data is a critical foundation of trust in an increasingly connected world. Modern MFPs do more than print and copy—they store, process, and transmit sensitive information, making them potential targets for cyber threats. Without proper security, unauthorized access, data breaches, and compliance violations can put your organization at risk.

At Konica Minolta, we take a layered security approach to safeguard your MFPs, ensuring end-to-end protection for your documents, devices, networks, and user access. Our security framework prevents unauthorized access, detects threats in real time, and enforces compliance with industry regulations such as HIPAA, PCI, CCPA, GDPR, FERPA, and CMMC.

YOUR TRUSTED PARTNER IN MFP SECURITY

bizhub SECURE is Konica Minolta's customizable security solution for MFPs, offering encryption, data protection, and access controls to safeguard sensitive information—without disrupting productivity. It forms the foundation of device security.

As an industry leader in document security, Konica Minolta provides customized, scalable security solutions that adapt to your organization's needs. Our expert-driven security assessments and proactive risk mitigation ensure your MFP fleet remains a secure and compliant part of your IT infrastructure.

With Konica Minolta, your MFPs transform potential security risks into **trusted assets** that support safe, efficient, and compliant document workflows.

KONICA MINOLTA'S LAYERED SECURITY STACK

A Comprehensive Security Framework

Konica Minolta's Layered Security approach provides comprehensive, multi-level protection for your MFPs, ensuring data, devices, networks, and users remain secure. Through the integration of advanced encryption, real-time threat monitoring, access controls, and regulatory compliance measures, our security framework enables organizations to reduce risk, safeguard sensitive data, and adhere to industry standards.

LEVEL	OUTCOME
5	CENTRALIZED SECURITY MANAGEMENT <ul style="list-style-type: none"> - Centralized monitoring and management of security policies for entire fleet of MFPs - Dashboard showing security status of entire fleet of MFPs - Auto-remediation to fix compromised security settings
4	BREACH DETECTION <ul style="list-style-type: none"> - Document level interrogation of all MFP activity - Alerts for security policy violations - Detailed logging of all device activity including print, copy, scan and fax
3	DOCUMENT SECURITY <ul style="list-style-type: none"> - Deletion of inactive files in print queues - Encryption of print jobs when transmitting over the network - Auditing and reporting on all activity for compliance - Watermarking of sensitive documents
2	ACCESS CONTROL <ul style="list-style-type: none"> - Authentication required to access functions - Single sign-on - Mobile-based biometric authentication - Secure pull printing
1	BASIC SECURITY <ul style="list-style-type: none"> - Storage encryption - Automatic deletion of temporary image data - Antivirus scanning of documents - Graphical representation of MFP security

LAYERED SECURITY

LAYER 1: BASIC SECURITY

Secure the Core of Your MFPs

MFPs should be protected from the inside out to prevent unauthorized data access. Our security features include:

Storage Encryption – AES 256-bit encryption to protect data stored on devices' storage media. This encryption method assures that all data is converted into an unreadable format, making it highly secure. Even if the storage media is removed or stolen, the encrypted data remains inaccessible without the correct decryption key.

Device-Based Security Monitoring – bizhub SECURE Notifier monitors your device settings in real time and alerts you instantly if security configurations change, helping protect sensitive data and maintain compliance. It offers simple, automated oversight so you can focus on your business with confidence.

Automatic Data Deletion – Confirms that latent document images are securely erased from devices. This function helps prevent outdated images from lingering on the device's solid state drive (SSD) or memory.

Embedded Antivirus (Bitdefender Option) – Detects and neutralizes malware in real time, scanning all incoming and outgoing data to ensure the device remains secure. It provides automatic updates to the virus definitions, keeping the protection current against the latest threats.

Secure Boot & Firmware Integrity – Konica Minolta bizhub MFPs use Secure Boot to confirm that only trusted, unaltered firmware runs on the device. At startup, a cryptographic signature check validates firmware integrity. If tampering is detected, the boot process is stopped to prevent compromise. This hardware-based protection ensures the device starts in a secure state, defending against persistent threats and safeguarding system and data integrity.

LAYER 2: ACCESS CONTROL

Control Who Uses Your MFPs

Unauthorized access to MFPs can lead to data leaks. Our solutions restrict device usage to authorized users only, preventing misuse while protecting sensitive information:

Secure Print Release – Print jobs only release upon authentication. Prevents sensitive documents from being left unattended and accessible to unauthorized individuals, strengthening document security and reducing printing errors.

Role-Based Access Control – Restricts functions based on user roles. Enhances security and helps manage risk by controlling access to various features.

IP Filtering – Limits device connectivity to authorized subnetworks. Only User PCs within the approved IP range can connect, boosting network security and preventing unauthorized access.

Flexible Authentication – PIN, password, mobile ID, or card authentication. This flexibility lets organizations choose the best authentication method, ensuring only authorized users access the device.

LAYER 3: DOCUMENT SECURITY

Keep Every Document Secure

Secure Print Queues – Automatically deletes unclaimed print jobs after a specified period. This helps maintain security by protecting sensitive documents from being left unattended and reduces clutter in the print queue.

Encrypted Print Transmission – Secures print data over the network, keeping sensitive information protected from interception and unauthorized access during transmission.

Watermarking & Document Tracking – Deters unauthorized duplication and enables tracking of document usage, making it possible to identify and trace any unauthorized copies.

Audit Logs & Reporting – Tracks all print, scan, copy, and fax activities and automatically creates logs that include user operations, the date and time of access, and the results of each action.

LAYER 4: PROACTIVE BREACH DETECTION

Security Protection for Document Breaches

Breach Alerts – Provides real-time notifications to administrators in the event of security violations. Sends automatic email alerts when predefined data patterns or keywords indicate a breach is detected.

Comprehensive Activity Tracking – Monitors all document-related transactions (print, copy, scan, fax) across the MFP fleet. Delivers detailed reports on user operations, helping administrators track usage, detect unauthorized actions, and ensure accountability.

User Tracking – Allows administrators to track who accessed specific documents and when, which helps in deterring unauthorized usage.

Real-Time Alerts & Notifications – Strengthens security by detecting policy violations, unauthorized document handling, and suspicious activity. This feature allows administrators to receive notifications via email when specific alerts are triggered.

Detailed Audit Logs – Provides time-stamped reports for compliance with HIPPA, PCI, CCPA, GDPR, FERPA, and CMMC to capture user operations, document access, and other activities, ensuring that all actions are recorded for audit purposes.

Monitoring for Suspicious Activity – Identifies irregular document handling and other suspicious activities instantly, utilizing advanced analytics and AI to detect and notify administrators of potential security breaches or policy violations.

LAYER 5: CENTRALIZED SECURITY MANAGEMENT

Fleet-Wide Visibility & Compliance

Fleet-Wide Monitoring – Real-time security insights across all devices in your network. This centralized monitoring system allows administrators to oversee the entire fleet from a single dashboard, helping to maintain optimal performance and security.

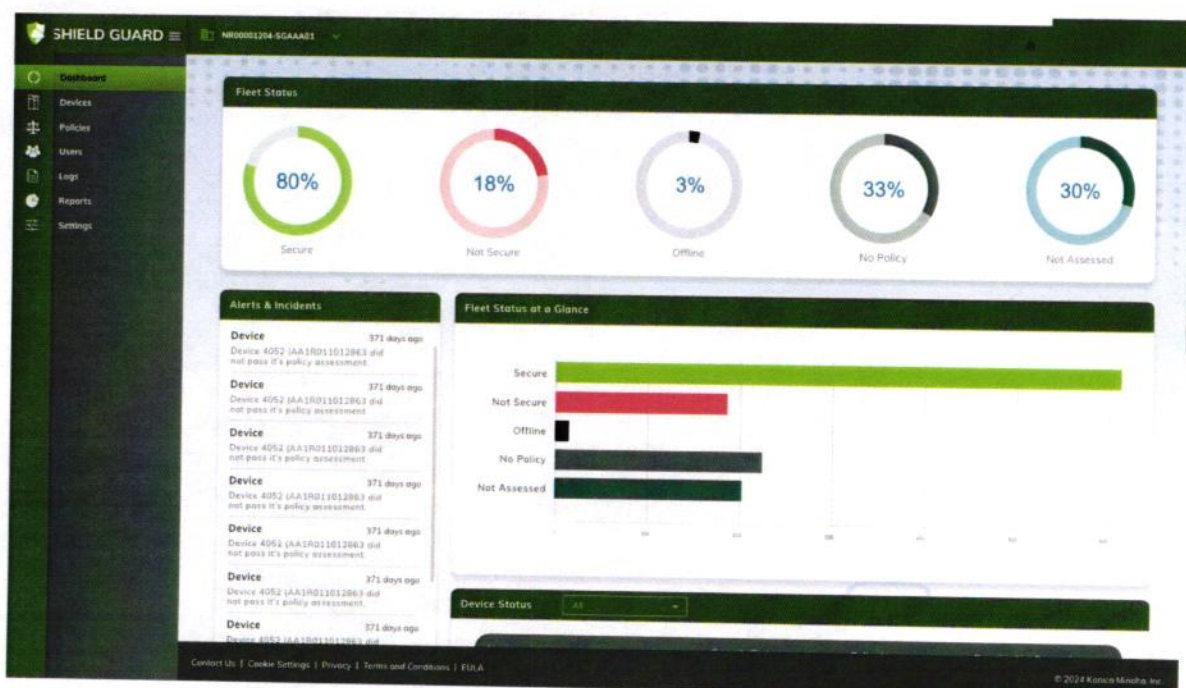

Automated Policy Enforcement – Delivers consistent security settings and automatically applies predefined security policies, helping to maintain compliance.

Auto-Remediation – Instantly fixes non-compliant settings. Detects failed security configurations and applies the appropriate policy settings to assure compliance.

Dashboard for Compliance & Risk – Provides an at-a-glance view of your organization's security status, allowing administrators to monitor compliance and risk metrics in real time.

SECURE YOUR MFPs WITH CONFIDENCE

Multifunction Printers (MFPs) play a vital role in business operations, handling sensitive data that requires robust security. Konica Minolta's layered security approach provides comprehensive protection by securing devices, data, documents, and user access to achieve compliance with industry regulations.

With advanced features like storage media encryption, secure authentication, real-time threat detection, and centralized security management, our solutions help safeguard against cyber threats, unauthorized access, and data breaches. By integrating cutting-edge security technology, Konica Minolta transforms MFPs from potential risks into secure assets, protecting your business with confidence.

Konica Minolta's advanced security solutions mitigate risks, protect data, and validates compliance across industries. Our layered security model transforms MFPs from potential vulnerabilities into trusted security assets.

EMPOWERING BUSINESS WITH SMART, SECURE SOLUTIONS

Konica Minolta's bizhub multifunction printers (MFPs) are built to support the evolving needs of today's workplaces—delivering a wide range of models that balance performance, versatility, and advanced security.

Whether your business requires high-speed output, vibrant color, or compact efficiency, bizhub devices are engineered to perform without compromising data protection.

With a strong commitment to security, Konica Minolta ensures consistent engine-level safeguards across all bizhub devices. From encryption and password protection to proactive threat detection, every device is equipped to defend against potential risks—helping organizations maintain compliance and peace of mind.

Contact us today to learn how Konica Minolta security solutions can protect your MFPs, data, and workflows.
